			計算の工夫-A①				正		

問題1 次の計算を工夫してしなさい。

$$\textcircled{1} \left(\frac{2}{9} \times \frac{5}{7}\right) \times \frac{7}{5} =$$

=

$$\textcircled{2} \frac{2}{5} \times \left(\frac{5}{2} \times \frac{7}{6}\right) =$$

=

$$\textcircled{3} \left(\frac{3}{8} \times \frac{4}{9}\right) \times \frac{9}{4} =$$

=

$$\textcircled{4} \frac{7}{10} \times \left(\frac{10}{7} \times \frac{3}{4}\right) =$$

=

$$\textcircled{5} \left(\frac{9}{8} \times \frac{12}{5}\right) \times \frac{5}{6} =$$

=

$$\textcircled{6} \frac{2}{3} \times \left(\frac{9}{2} \times \frac{7}{6}\right) =$$

=

$$\textcircled{7} \left(\frac{8}{15} \times \frac{2}{9}\right) \times \frac{27}{2} =$$

=

$$\textcircled{8} \frac{2}{5} \times \left(\frac{10}{2} \times \frac{3}{8}\right) =$$

=

問題2 次の計算を工夫してしなさい。

$$\textcircled{1} \left(\frac{3}{4} + \frac{1}{5}\right) \times 20 =$$

=

=

$$\textcircled{2} \left(\frac{3}{5} - \frac{1}{2}\right) \times 10 =$$

=

=

$$\textcircled{3} \left(\frac{3}{2} + \frac{2}{3}\right) \times 6 =$$

=

=

$$\textcircled{4} \left(\frac{5}{7} - \frac{9}{14}\right) \times 28 =$$

=

=

$$\textcircled{5} \left(\frac{7}{6} + \frac{3}{10}\right) \times 30 =$$

=

=

$$\textcircled{6} \left(\frac{3}{5} - \frac{1}{7}\right) \times 35 =$$

=

=

$$\textcircled{7} \left(\frac{3}{8} + \frac{7}{9}\right) \times 72 =$$

=

=

$$\textcircled{8} \left(\frac{3}{4} - \frac{3}{11}\right) \times 44 =$$

=

=
